

One ROME edit, validated then restored

$(s, r): o_{old} \rightarrow o_{new}$

B_0 · zero thinking — edit passes

$\langle \text{think} \rangle \langle / \text{think} \rangle$ answer: o_{new}

B_3 · native chain — edit undone

$\langle \text{think} \rangle \dots o_{old} \dots \langle / \text{think} \rangle$ answer: o_{old}

answer logits untouched

T · think-span suppression — restored

$\langle \text{think} \rangle \emptyset o_{old} \dots \langle / \text{think} \rangle$ answer: o_{new}
